Simple, yet powerful an all-in-one POS

Simple yet powerful, Lightspeed gives you the flexibility and functionality to access everything you need to run a successful hospo business, whether you're a coffee van or a large franchise network. Easily adapt your POS to your business strategy.

Getting started is quick and simple

Quick to set up, easy to use and simple to manage. Our intuitive design allows you to start serving straight away with little to no training.

Have front and back of house working in sync

Save time and streamline your POS workflows with features built to help your team work together for faster service and happier customers.

Reduce overheads and run with less staff

Automate your admin, understand your costs and streamline your service with simple tools that save you time and money.

Work the way you like

With flexible hardware options across IOS, android and windows and the ability to access back office on any device, how you work has no limits.

All your tools in one place

Lightspeed is ever evolving with new features and functionality to support your business, easily add integrations or products as your business builds to increase your efficiency.

Support when you need it

Make service run smoothly every time. Access 24/7 free support via live chat, phone or email and speak to someone who understands hospo in minutes.

Lightspeed POS makes managing multiple sites a breeze.

“ The moment we switched over to Lightspeed...it was just night and day from where we were from a POS perspective, it was sigh of relief, the functionality, the ease of adjusting on fly..the logic applied to how it operates from the back end perspective, I could have shed a tear when we made the switch..i'm not sponsored by Lightspeed, but I just think the back end of Lightspeed is one of the most intuitive operating systems I can imagine, it makes sense, it's easy to add or change a product, it's easy to switch a product on all our POS (sites) or one of our POS ”
